Black Relay — how it fits together

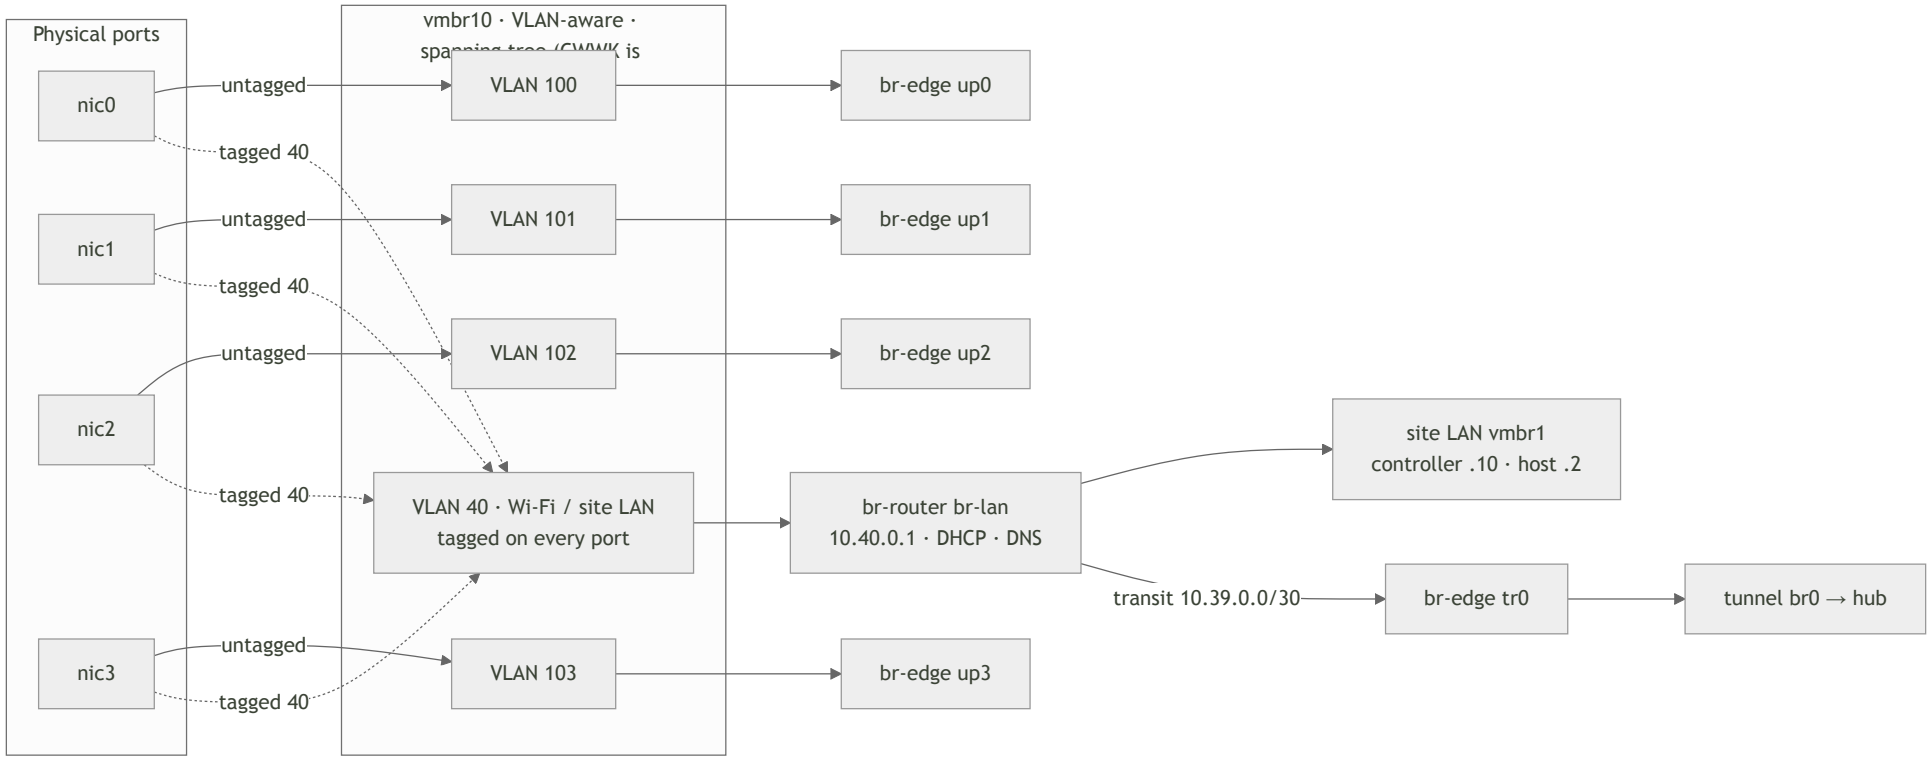

CWWK site box · multipath tunnel · BR2026 hub · site lock · Sensor Fusion. Source: multipath/docs/diagrams.md

1. End to end: every modem, its own carrier, one hub
2. Inside the CWWK: one port bridge
3. What each port becomes
4. Packet pipeline: deconstruct, spread, reconstruct
5. One group, end to end
6. Resequencer decisions
7. Adaptive FEC (GT_FEC=auto; off today, GT_FEC=0)
8. Self-healing
9. Remote access to the site controller
10. Many sites, one hub
11. Site lock: power-on to unlocked
12. Sensor Fusion on BR2026
13. Site services and the Ethernet switch (switch and VLAN 41: planned)
